

A World of Bathroom Furniture

Benefits

Right opening

Right opening door.

Left opening

Left opening door.

Push to open

Gently pressing the centre of the drawer or door facilitates the opening and closing process.

Soft close (drawers)

This slow closing system ensures that drawers close softly and slowly, for extended product durability.

Soft close (doors)

This slow closing system ensures that doors will close softly and slowly, for extended product durability.

Reversible

This system ensures that the door opens to the right or left with just one turn.

Furniture unit that can be installed with legs

This set of optional legs are specially designed to install the unit on thin walls, so that it can be better secured.

Reduced depth unit

The solutions with reduced depth are ideal for making the most of small areas.

Height-adjustable shelves

The internal shelves may be placed at different heights, so that there are no space limitations.

Space saving syphon for compact units

It allows maximization of the available space for storage.

Diverta Bathroom Furniture

Ventilation

Constant moisture can affect the external features of the furniture, leaving the doors and/or windows open after each shower or bath minimizes moisture and therefore, its effects on the furniture. Wiping with a dry cloth ensures a longer life for the furniture.

Sealing

It is recommended that the area between the furniture and the sink should be sealed using a neutral transparent silicone (without chemical additives). This seals the product, preventing water from stagnating and guaranteeing that the water slides on the hydrophobic surface of the furniture. To ensure the perfect state of the furniture during and after the installation, it is recommended to always support the furniture in padded areas (such as the box itself) and to check water and electric connections before the installation.

Heating

Please refrain from installing the furniture too close to heat sources such as radiators and heat emitters. The high temperatures (or even the effect of a prolonged exposure of the furniture to sunlight) combined with moisture can have undesirable effects on the surface of the furniture.

Real wood characteristics

If the wood finish is made from real wood, it is susceptible to variations in color, texture and patterns. These variations cannot be considered as quality defects but as characteristics of natural materials.

Soft close drawers

All Roca furniture products incorporate soft closing doors and drawers. It is recommended to avoid sudden movements when opening or closing the furniture to ensure the correct function of the soft closing system.

Regulation of drawers and doors

To ensure an impeccable aesthetic look as well as the correct functioning of drawers and doors, they are equipped with regulation systems. Drawers and doors must be readjusted after the furniture assembly process. Handle these systems with care and always follow the instructions in the installation manual included with your product. In case of doubt, consult an installer.

Cleaning and maintenance

Roca furniture is easy to clean thanks to the materials used in its manufacture. Using a damp cloth is enough to clean any unwanted residue for both furniture and the basin. In case of stubborn stains, a low amount of neutral soap liquid can be used to rub gently. We do not recommend using abrasives, chemical products or products containing acids (especially on lacquered surfaces) or spraying the furniture with excess water as this may have an adverse effect on your bathroom furniture.

Metal parts

To guarantee the brightness and durability of the furniture's metal parts, we recommend cleaning with a damp cloth and liquid soap. We do not recommend using abrasive pads for cleaning.

Maintenance

Bathroom Furniture - Tips for use and maintenance (MDF). Roca Bathroom Furniture is made of materials designed specifically for their use in bathroom spaces. We suggest these tips in order to keep your furniture looking its best.
